

Fenceline and Ambient Air Monitoring

ORTECH Provides the Right Solution for your Site

Fenceline Surveys

The latest in technology-based fenceline surveys are available for your site's airborne chemical assessment issues. Instrumentation such as Open-path FTIR, UV, GC-FID, noise and particulate monitors produce valuable real-time data. Passive and dynamic samplers can provide cost-effective alternatives.

Mobile Monitoring

ORTECH has a fleet of vehicles at their disposal, fully equipped with the latest in air monitoring instrumentation including SO₂ Detectors, Particulate Analyzers and advanced Gas Chromatography.

Airshed Monitoring

ORTECH has provided cost-effective regional airshed monitoring, modelling and reporting since the late 1950's. Programs are customized with multi-stakeholders in mind, including industry, communities and regulators. These comprehensive surveys include Passive, Discrete and Real-time, continuous monitoring to reliably meet our clients' needs.
